

Don't put up with hard water anymore!

The most obvious sign you live in a hard water area is the limescale build up on your taps, showerhead and of course, in your kettle.

But think about it. If you fill your kettle with hard water that also means it's running through your boiler, washing machine and pipework too.

Banish limescale forever with the next generation water softener

premier
COMPACT

With e-max technology it combines maximum performance and efficiency in a compact design and ensures unparalleled levels of limescale prevention 24 hours a day - **the ultimate in soft water convenience.**
